To whom it may concern

I am writing to you to put forward my support for Biffa Waste Services Ltd.'s planned Energy Recovery Facility (ERF) at Clarion Close, Swansea.

We would support Biffa's proposed development of this facility due to the environmental and economic value it will add to the region. The proposed development on the one hand, is a solution to maintaining demand for local workforce and on the other, a sustainable method of electricity and heat generation, while at the same time reducing local carbon footprint of the region.

Jim Davies Civil Engineering (formed as a limited company in 1976) is now a vastly experienced Civil Engineering company that provides employment to over 25 local people, many of whom have been employed by the company for over 20 years. We are a supplier of civil engineering services to Biffa Waste and the planned ERF at Clarion Close, Swansea would enable our organisation, if successful in bidding for the contract to maintain our current workforce and also to source employment locally to the facility.

We wish to emphasise that the development of an ERF would add significant economic and environmental value to the region.

Yours faithfully

Martin Parry
